SUMMARY

Software Engineering undergraduate pursuing a Bachelor of Information and Communication Technology (BICT Hons) specializing in Software System Technology at the University of Kelaniya. Experienced in full-stack web development, AI-powered applications, REST API development, database design, IoT systems, and software engineering projects. Proficient in JavaScript, Python, Java, PHP, React, Next.js, FastAPI, MySQL, and Git. Passionate about designing scalable software solutions and seeking a Software Engineering Internship where I can contribute while expanding my technical expertise.

PROJECT EXPERIENCE

Hospital Appointment System – Group Project	2026
<i>Technologies: React.js, Supabase, PostgreSQL, Tailwind CSS, React Router</i>	
- Developed the Patient Panel for a role-based Hospital Appointment Management System. - Implemented patient registration, login, profile management, and appointment booking. - Built appointment management features including booking, cancellation, and appointment history. - Developed responsive patient dashboards with notifications and mobile-friendly navigation.	
EduRAG+ – Individual Project	2026
<i>Technologies: FastAPI, LangChain, Pinecone, MySQL, OpenAI API, HTML, CSS, JavaScript</i>	
- Designed and developed an AI-powered RAG platform for syllabus-aware exam preparation. - Built REST APIs using FastAPI. - Integrated LangChain and OpenAI API for intelligent question answering. - Used Pinecone vector database for semantic document retrieval. - Implemented query analytics and document validation.	
Student Management System – Individual Project	2025
<i>Technologies: PHP, MySQL, HTML, CSS, JavaScript, PDO</i>	
- Designed and implemented a role-based Student Management System. - Developed authentication and authorization. - Built CRUD operations for students, teachers, attendance, announcements, and grading. - Designed MySQL relational database with secure PDO prepared statements. - Applied MVC architecture principles and responsive UI design.	
Smart Irrigation System – Group Project	2025
<i>Technologies: ESP32, IoT, Firebase, Arduino, C++</i>	
- Developed an IoT-based smart irrigation system for automated water management. - Integrated multiple sensors for real-time monitoring and valve control. - Implemented Firebase-based remote monitoring and automation features. - Improved irrigation efficiency and water conservation through smart control.	

TECHNICAL SKILLS

Programming : JavaScript, TypeScript, Python, Java, PHP, C, C++, SQL, Kotlin
Frontend : React.js, Next.js, Angular, Flutter, HTML5, CSS3, Tailwind CSS, Material UI
Backend : Node.js, Express.js, FastAPI, PHP, ASP.NET Core, REST APIs
AI : OpenAI API, LangChain, LangGraph, RAG, Prompt Engineering, Vector Databases
Databases : MySQL, PostgreSQL, MongoDB, Supabase, Firebase, Oracle SQL
Cloud & Tools : Git, GitHub, Postman, VS Code, Android Studio, Firebase

SOFT SKILLS

Leadership, Teamwork, Effective Communication, Problem Solving, Critical Thinking, Time Management, Continuous Learning, Multitasking, Project Management

EDUCATION

University of Kelaniya, Sri Lanka – Faculty of Computing and Technology

Bachelor of Information and Communication Technology (Honours)

Specialization: Software System Technology

Current GPA: 3.17/4.00

Relevant Coursework

Structured Programming, Web Programming, Software Engineering, System Analysis and Design, Software Architecture, Object Oriented Programming, Data Structures and Algorithms, Advanced Databases, Quality Assurance, Requirement Engineering

C-Clarke Institute

Diploma in Advanced AI & Software Engineering (Ongoing)

Relevant Coursework

Python & AI/LLMs, Prompt Engineering, Enterprise Java & Spring Cloud, Web (React, Angular), Flutter, OOP & Design Patterns, Databases, QA & Automation, Project Management, AWS Cloud, DevOps & Version Control

PROFESSIONAL CERTIFICATIONS

Diploma in ICT and English	2022
ICBT Campus	
Introduction to IoT	2020
Cisco Networking Academy	
Introduction to Cybersecurity	2020
Cisco Networking Academy	

EXTRA CURRICULAR ACTIVITIES

- Active Member – Information Technology Students’ Association, University of Kelaniya
- Participated in university technology workshops and software development events
- Collaborated in group-based software engineering and academic projects
- Participated in coding and innovation competitions
- Volunteer contributor for university and community technical activities
